Summary of our partnership

Today, we see lots of violence in every fields of life. Countries are fighting all around the world, neighbours are fighting each other, supporters are fighting on the matches, friends are fighting on the streets, parents are fighting each other at home and finally our students are fighting even for a very little subject in the schools.

When we turn on the TV, we see the same fact in films, in the news, in sports programmes, competitions etc.

But why do we have so little tolerance to each other? Is it so difficult 'to live and let live'?

The problem is that our young generations, our students live in this atmosphere. If they grow up in such a world and learn that bad life style, it is possible that they will also do the same things in the future.

A common proverb says "Train a child while his mind is pliant." If so, we must prevent our next generations from the same behaviors, so first of all, we should be tolerant to all people and see them as our siblings, and teach it to our students. We should show our students that all human beings are a 'treasure'.

In this project we have done some activities on the theme of Peace, Tolerance and Brotherhood such as writing poems, compositions, drawings, arranging walks and visits, holding bazaars, planting trees, preparing calendars, seminars, wall panels, logos, creating and maintaining a web site, arranging pen-pals among the students, learning some famous people's ideas and messages about the theme, acting theatre plays, concerts, arranging campaigns and preparing posters, albums and booklets.

We have searched the reasons of fights at home, in the class, in the streets, in the town, in the cities and at last in the world.

Then, we have tried to find some solutions.

With all activities in our project we aimed to show that all the people can live together in peace.
