Task 1.

There are a lot of clashes and wars nowadays in the world. In your essey (50 -100 words):

- Write what you think 'war' is
- Describe how it changes everyday life of a town, or a village
- Write if it makes any changes to people's characters/personalities.

WARS

War is a conflict between countries, nations and groups. It is also a tragedy for families, material losses and many fatalities.

Wars are characterized by extreme violence and economic destruction.

In my opinion war isn't a good solution, because many helpless people (also women and children) die. When soldiers are fighting old monuments, paintings and museums are being destroyed. So. It is a huge loss for culture.

Wars are also needless stress for innocent people. Wars introduce chaos and a lack of food. Many people die because in a place where the war is there is no food and there are many ilnesses.

Unfortunately nowadays we can come across a lot of situations where there are no solution but war. But military actions are not the best solutions. I think that people must learn how to negotiate. I believe that there is always a peaceful solution to a problem.
