

Task 1.

There are a lot of clashes and wars nowadays in the world. In your e-mail (50 -100 words) to an English – speaking friend:

- Write what you think 'war' is
- Describe how it changes everyday life of a town, or a village
- Write if it makes any changes to people's characters/personalities.

Dear Paweł

I think that a war is something terrible. With every clash a lot of innocent people die. In some people's opinions wars are the easiest form of solving international problems. However, I think that only stupid humans haven't got wise arguments which don't require using force.

During a war everyone worries about his life. Some people suffer or die from hunger. Another ones are murdered. A lot of factories and shops are closed.

In my opinion wars make big changes in people's characters. They often lose their families, children must go to work.

Write back soon,
